Luftkissengleitboot – the legend returns

FACE-GRAPHIC.COM

IMPERIAL
YACHT
MANUFAKTUR

The feeling is indescribable – sitting in a yacht that literally made history. In the original design of the world's first hovercraft of 1915, this boat reminds us of historic maritime pioneer work. A totally new maritime experience based on state-of-the-art technology. Redesigned tearing edges and air injection into the plenum chamber create a sheet of drift with ultimate performance. Three high efficiency maritime motors by STEYR provide the necessary propulsive force.
